

## Sustainability report 2019 - 2020

1. Comparing between 2019 and 2020 we reduced the amount of used KW for 20%. The average electricity consumption per guest in 2019 was 6,2 KW, in 2020 was even 4,2.
2. We have taken several steps in order to reduce the consumption of electricity, replacing all the broken light bulbs with new LED, we placed several motion sensors to automatically switch off lights when facilities are not in use. We always paid attention to the energy class when buying new products (e.g. washing machine).
3. Comparing between 2019 and 2020 we reduced the amount of water for 20%. We successfully reduced the consumption of water between the summer season. The average water consumption per guest is lower comparing the two years. Probably also due to lockdown because of covid.
4. We are increasing the number of local business partners. Adding new local products to our offer and also organizing a corner with local products. Also we have a new farm who is delivering goat yogurt to us named Kmetija Švab from Zazid.
5. We strengthened our collaboration with Naravni rezervat Škocjanski zatok and we are supporting them in the work group established to enforce the role of protecting the natural area in Slovenian Istria.
6. We were raising awareness about recycling and reusing through the social media in collaboration with Marjetica Koper d.o.o.
7. We enhanced the partnership within tourist cooperative Treasures of Istria to develop new tourist products with the cooperation of small tourist stakeholders.
8. We supported our employee to attend courses in order to get new knowledge.
9. We organized several staff training concerning all issues regarding the sustainable pillars.
10. Monthly recording energy consumption and way to identify wastages, extraordinary consumption or leakages.
11. We increase the purchasing environmentally friendly cleaning supplies.
12. We also keep records of all chemical's details including consumption, storage quantities.
